

Manmotype Token (MAN) — Complete Whitepaper

Contract: 0xbb4AcAdf2Db8AaDb83ca0Ad32C96bC7C4dD923a3

Verified on BscScan: 2025-11-22

This whitepaper is prepared to satisfy BscScan update requirements and to provide a complete public record of token design, distribution, and security practices.

Table of Contents

1. Executive Summary
2. Token Specification
3. Liquidity & PancakeSwap
4. Tokenomics
5. Security & Ownership
6. BscScan Checklist
7. Publish on GitHub Pages
8. Contact & Links

1. Executive Summary

Manmotyme Token (MAN) is a fixed-supply BEP-20 token deployed and verified on BscScan. The contract contains no mint, burn, tax, or pause features. This document provides the facts required for token listing and verification.

2. Token Specification

Name	Manmotype Token
Symbol	MAN
Decimals	18
Total Supply	9,000,000,000 MAN
Network	BNB Smart Chain (BEP-20)
Contract Address	0xbb4AcAdf2Db8AaDb83ca0Ad32C96bC7C4dD923a3
Verified On	2025-11-22

3. Liquidity & PancakeSwap

Initial liquidity pair created on PancakeSwap. Provide proof of liquidity, lock information if applicable, and pair link below.

<https://pancakeswap.finance/v2/pair/0x8AC76a51cc950d9822D68b83fE1Ad97B32Cd580d/0xbb4AcAdf2Db8AaDb83ca0Ad32C96bC7C4dD923a3?chain=bsc&persistChain;=1>

4. Tokenomics

Category	Amount	Percent
Community & Airdrops	2,250,000,000	25%
Liquidity Pool	1,800,000,000	20%
Ecosystem	900,000,000	10%
Team & Advisors (vested)	900,000,000	10%
Development & Treasury	900,000,000	10%
Marketing & Growth	900,000,000	10%
Reserve (locked)	450,000,000	5%

5. Security & Ownership

Recommended: publish owner address, transfer critical assets to multisig, lock liquidity and publish lock proof, and consider an audit. The existing contract restricts owner privileges to name/symbol updates only.

6. BscScan Checklist

Item	Action
Contract verified	Include compiler and settings in repo
Tokenomics	Publish allocation and vesting
Liquidity proof	PancakeSwap pair and lock proof
Social links	Telegram, GitHub, Medium, Reddit, Twitter
Whitepaper	Link to PDF on GitHub Pages

7. Publish on GitHub Pages (Quick Steps)

1. Create a GitHub repository named 'manmotymetoken' and set it public.
2. Upload site files: index.html, tokenomics.html, styles.css, assets/Manmotyme_Whitepaper_Complete.pdf.
3. In the repo: Settings → Pages → Deploy from branch: select 'main' branch and folder '/' (root). Save.
4. Wait a few minutes — your site will be available at <https://github.io/manmotymetoken/>
5. Use this GitHub Pages URL in the BscScan Update Token Info form.
